ANNOUNCEMENT.

IN presenting our Wholesale Autumn Catalogue of Bulbs, Plants, Seeds and Implements, it gives us great pleasure to announce that we have added this year, to our already extensive Plant Establishment, Bulb and Seed Departments. To many of our customers it will be welcome news when we say, that, by the spring of 1892, we will be able to furnish the most complete list of Plants, Seeds, Bulbs and Implements yet offered.

The success that has marked our short career is sufficient reason for us to continue to do business on the same substantial basis which has brought our name so prominently before the public, namely: that every article leaving our establishment shall be in good condition and absolutely true to name; and that prices will be as low as goods of equal quality can be procured for in any market.

Our name has become so associated with Chrysanthemums, Orchids and Palms, several of the finest varieties in existence having been disseminated from our establishment (such as the Mrs. Alpheus Hardy and Louis Boehmer Chrysanthemums), that we are headquarters for these popular plants, our stock being the largest in the country. Our specialties, for which we are already famous, are Orchids, Cyrtipediums, Hardy Perennials, Palms, Foliage Plants and Chrysanthemums.

PITCHER & MANDA,

European Branch:
Hextable, Swanley, Kent, England.

Short Hills, New Jersey.

TO OUR CUSTOMERS.

Our prices will be found to compare favorably with those of other responsible houses, to be consistent with the fact that our bulbs are extra selected, direct from the best growers in Holland, France, California, Mexico and other native localities.

For the past season it has been very gratifying to us to read the many kind recommendations to new customers with which we have been favored. Should the friends of any of our customers require Bulbs, Seeds, etc., to whom a copy of our retail catalogues would be acceptable, for intimation of the fact we shall feel much obliged.

The United States Nurseries are situated in Short Hills, N. J., on the D. L. & Western R. R., only 17 miles from New York City.

We are pleased to see visitors at any time. A personal visit will facilitate selection of plants and afford an opportunity of seeing the extent of our nurseries.

TERMS: Accounts are made up monthly. Our patrons are requested to remit by checks, express, or P. O. money orders on New York Post Office, or currency in registered letters, as we cannot be responsible for money in unregistered letters. From unknown correspondents either a remittance or a reference is required with each order.

NO CHARGES are made for boxes, packing or delivery to the railroad or express office. All plants are carefully packed and may be forwarded safely to any part of the globe.

ORDERS ARE SOLICITED at as early a date as possible, that we may have ample time for their execution. Please write plainly, name, post office, express office, and any other necessary information as to the best method of forwarding.

ADVICES OF SHIPMENT, together with the invoice, are sent the same day goods are forwarded.

COMPLAINTS, if any, should be made on receipt of goods. We promise prompt and just treatment of all claims presented. (We guarantee safe arrival of plants sent by express, but do not assume any responsibility if sent by freight.)

TIME OF DELIVERY AND SHIPMENT.

The many kinds of bulbs herein catalogued ripen and are in condition for shipment at different seasons of the year. We give below the month in which most of the leading kinds are ready, to assist our customers in deciding whether their orders shall be held for one shipment or forwarded in part as the bulbs are ready for delivery.

The following varieties of bulbs are ready and can be forwarded as follows :

Roman Hyacinths.	August.	Dutch Hyacinths.	September.
Narcissus, Paper White.	"	Tulips.	"
" Poeticus ornatus.	"	Narcissus.	"
" Trumpet major.	"	Crocus.	"
Allium Neapolitanum.	"	Calla Lily, dry bulbs.	"
Jonquil Campernelli.	"	Ixias.	"
Ornithogalum Arabicum.	"	Iris.	"
Anemone fulgens.	"	Narcissus, Chinese Sacred.	October.
Lilium candidum.	"	Spiræa Japonica.	November.
" longiflorum.	"	Lily-of-the-Valley.	"
" Harrisii.	"	Lilium auratum.	"

Condensed List of Florists' Bulbs.

For Forcing and Other Purposes, to Which We Call Special Attention.

HYACINTHS, DUTCH.

	Per 100	Per 1,000
Double and Single Choice Named Varieties —Red, Blue and White; most suitable for forcing	\$4 50	\$40 00
Mixed, Unnamed Varieties. Colors separate. Suitable for forcing and bedding. Single and Double in equal quantities of each color	3 00	25 00

HYACINTHS, ROMAN, EARLY WHITE.

13 centimeters (5¼ inches) and above in circumference . . . for 3,000, \$60; for 5,000, \$95 . .	23 50
12 to 15 centimeters (4¾ to 5¼ inches) “ “ for 10,000, \$160 . .	18 00

The latter is an unusual size and a special lot which we have secured from a very reliable source, and from samples submitted we believe that florists will do well to secure a quantity at the price quoted, which is extraordinarily cheap.

11 to 14 centimeters (4¾ to 5½ inches) in circumference for 5,000, \$77.50 . .	16 00
For other varieties and sizes, see body of list.	

TULIPS.

Best forcing varieties, Yellow, White, Striped and Scarlet, in equal quantities, separate colors, our selection for 5,000, \$60 . .	12 50
---	-------

LILIUM HARRISII (Bermuda Easter Lily).

When wanted in larger quantity, write us for special price, which we guarantee to be satisfactory.

	Per 1,000		Per 1,000
4 to 5 inches in circumference	\$20 00	7 to 9 inches in circumference	\$65 00
5 to 7 “ “ “ “	45 00	9 to 11 “ “ “ “	110 00

LILIUM LONGIFLORUM.

	Per 1,000		Per 1,000
5 to 7 inches in circumference	\$45 00	9 to 11 inches in circumference	\$110 00
7 to 9 “ “ “ “	65 00		

NARCISSUS, VON SION.

Selected bulbs. A very scarce article.	15 00
---	-------

NARCISSUS, PAPER WHITE.

Selected bulbs	8 00
Grandiflora	12 00

☞ For other varieties see general list, page 8.

Other Good Forcing Stock.

	Per 100	Per 1,000
LILIUM candidum. Selected bulbs	\$3 00	\$25 00
“ “ Extra large selected bulbs	3 50	30 00
FREESIA refracta alba.	1 00	8 00
ALLIUM Neapolitanum	1 25	10 00
ASTILBE Japonica. Strong clumps	5 50	45 00
LILY OF THE VALLEY. Extra three-year old Berlin pips		
“ “ “ “ “ “ in lots of 5,000, \$9.60 per 1,000 . .		10 00
JONQUIL Campervelli.	1 25	10 00
ORNITHOGALUM Arabicum 35 cts. per doz.	2 25	
ANEMONE fulgens	2 00	18 00
HELLEBORUS niger		12 00
CHIONODOXA Lucilæ	1 00	7 50
NARCISSUS, Chinese Sacred	8 00	75 00

Florists' Forcing Shrubs.

AZALEA INDICA.

Having contracted with one of the largest European nurserymen to grow specially for us an enormous quantity of these handsome shrubs, for which there is an increasing demand each year, we are in a position to offer fine selected, healthy stock, well set with buds, at the following prices:

First Size.	27 to 30 inches in circumference	Per doz.	Per 100
		\$4 00	\$30 00
Second Size.	35 to 45 "	7 00	50 00
Third Size.	45 to 60 "	10 00	75 00
Fourth Size.	60 to 75 "	12 00	95 00
Extra Large Specimens.	\$1.50 to \$5 each, according to size.		

In selecting a suitable size we would suggest that florists take a good portion of the second size, that being the best size at a low price, and will be sure to give satisfaction.

AZALEA MOLLIS.

Fine for forcing.

Strong Bushes	\$6 00	\$45 00
--------------------------------	--------	---------

RHODODENDRONS.

Selected varieties for forcing.

Strong Bushes	Per doz.	Per 100
Extra Strong Bushes	\$10 00	\$75 00
	12 00	95 00

New Things.

There are many articles offered us from different parts of the world in the line of new and rare choice novelties, but it has invariably been our custom to give each article a fair comparative trial, so that we may actually become acquainted with its true merit and individuality in comparison with other standard sorts. We have now numbers of these so-called new things, some of which promise to be great acquisitions, while others are not desirable enough to retain, thus showing us the necessity of a thorough trial before offering the articles for sale. It has been our custom to offer nothing that we know only by the recommendation and description of others.

CHIONODOXA GIGANTEA.

(Giant Glory of the Snow.)

It was our good fortune last year to secure a few hundred bulbs of this grand new variety of *Chionodoxa* for trial from the originators, and we were so exceedingly gratified with the result that we have concluded to plant this year, for forcing, a very large number.

In comparison with the well known variety *C. Luciliae*, the *gigantea* certainly is what its name would imply, the flower being at least three times as large. For forcing, either in frames or greenhouses, it is equally desirable and certain of success. Each bulb produces a perfect cluster of very showy star-shaped flowers, at a season when flowers of its color, a rich clear blue, are most in demand. We have secured a large number of this grand variety, which, when once known among florists, will, we feel certain, become as popular as the Freesia or the *Milla biflora*. Being perfectly hardy, it can be planted outside with safety. It is very pretty for edging or beds. 25 cents per dozen, \$1.50 per 100, \$12 per 1,000.

GENERAL LIST OF BULBS

For Bedding and Forcing.

HYACINTHS.

UNNAMED MIXED HYACINTHS.

Where cheap and good Hyacinths are wanted for bedding, forcing and cut-flowers, our mixtures are unsurpassed, and are certain to give satisfaction. These mixtures in many cases will be found quite as useful as the more expensive named sorts.

ROMAN HYACINTHS.

We are very large importers of these and all other important French florists' bulbs. This year especially, we are guaranteed extra fine flowering bulbs, and those who have not already placed their order with us and taken advantage of our prices, should do so at once, as the price is likely to advance without notice, on account of stock becoming exhausted, owing to the very large sales we are making.

Per 100 Per 1,000

Early Single White. $5\frac{1}{8}$ to $5\frac{1}{2}$ inches or 13 to 15 centimeters in cir- cumference	\$2 50	\$23 50
$4\frac{3}{8}$ to $5\frac{1}{2}$ inches or 11 to 14 centi- meters in circumference	2 00	16 00

Hardy Perennials or Herbaceous Plants.

We make a specialty of hardy herbaceous plants, and devote acres of land to their culture. During the past year or two there has been a greatly increased demand for plants of this class, and there is much to be said in praise of them. With a good selection the garden is gay with their blossoms from the time snow leaves the ground in spring, until late autumn. We are continually adding fine novelties, both from our special collectors and from other sources.

Many species and varieties have proved excellent for forcing, and others that have not as yet been tried, will undoubtedly prove useful in the same direction. For florists and others purchasing plants to supply cut-flowers, a large number of plants of few varieties are preferable to a few plants each of many varieties.

We send out none but healthy stock, true to name, and sure to give satisfaction. A personal visit to our nursery at any time during the summer is sure to be of interest.

	Per doz.	Per 100		Per doz.	Per 100
ACHILLEA "The Pearl." The flowers, which are borne upon erect foot-stalks, are of the finest white, and closely resemble a pompon chrysanthemum. Succeeds anywhere, and flowers almost the whole season. A grand acquisition for cutting	\$1 00	\$5 00	stems; useful for cutting or the open border	\$1 25	\$6 00
A. tomentosa. Flower heads flat, of an unusually good yellow, and remaining a long time in perfection; excellent for spring cutting . . .	1 50	9 00	A. Japonica alba. Flowers of the purest white, in late fall. A grand flower for cutting	1 25	6 00
AGROSTEMMA coronaria. An erect branching plant, with handsome silvery foliage, covered in summer with bright pink flowers. A valuable border plant	1 50	10 00	A. Japonica elegans. Similar to the type, but with broader leaves and pale rose-colored flowers, often 3 inches across	1 50	10 00
A. coronaria alba. A variety of the above, with white flowers	1 50	10 00	A. Pennsylvanica. Flowers pure white, on long, slender foot-stalks, produced in great profusion in early summer. A bright plant in borders, and excellent for cutting .	1 00	6 00
AJUGA alpina. A splendid bedding plant, the handsome foliage making a fine mat throughout the year; covered in spring with spikes of white flowers	1 25	8 00	AQUILEGIA Canadensis. Flowers scarlet and yellow, on slender, branching stems. An early spring flower, of excellent habit	1 00	6 00
A. Genevensis. Taller growing than the last, bearing spikes of bright blue flowers in spring	1 25	8 00	A. chrysantha. Flowers beautiful golden yellow. One of the finest of hardy perennials for the border .	2 50	25 00
A. pyramidalis. An erect growing species, with spikes of blue and purple flowers in May and June .	1 50	9 00	A. vulgaris alba. A stately plant, the nodding flowers borne on slender, erect stems. Showy in borders, and fine for early cutting . .	1 25	8 00
A. reptans. The creeping habit of this plant makes it valuable for carpeting; flowers in May	1 00	6 00	ARABIS albida. An excellent plant for spring bedding, the dense tufts of white flowers appearing in April	1 00	6 00
A. reptans alba. A variety of the above, with white flowers	1 50	9 00	ARTEMISIA pontica. A good bedding plant, with silvery leaves and yellow flowers. Valuable for its aromatic fragrance. Excellent for florists to sell in pots	1 00	6 00
ALYSSUM saxatile compactum. A good plant for early spring bedding, forming compact tufts bearing yellow flowers	1 50	9 00	ASCLEPIAS tuberosa. One of the best border plants. Flowers a most brilliant orange, lasting long in perfection. Height 2 feet . . .	1 25	8 00
ANEMONE Japonica. One of the most valuable fall flowering perennials, producing showy rose-colored flowers on long slender			ASTER Douglasii. Flowers purple, in August, on branching stems . .	1 00	6 00
			A. Novæ Angliæ. One of the best asters, of a tall, robust habit, bearing purple flowers in terminal clusters in September	1 25	8 00

	Per doz.	Per 100
ASTER ptarmicoides. The finest white flowering species, blooming in late fall; excellent for cutting .	\$1 50	\$10 00
A. simplex. Flowers pale blue; stems three to six feet high, sparingly branching	1 00	6 00
A. in many Varieties. The brilliancy of these flowers and their late time of blooming make them especially valuable for cutting; they range through a great variety of shades and are in bloom through September and October	1 25	8 00
BAPTISIA australis. The finest tall blue flowering perennial. The foliage is handsome and the dark blue flowers hang in graceful racemes .	1 50	10 00
BERBERIS aquifolium. A low shrub, three to six feet high, with compound, spiny toothed leaves, and yellow flowers in crowded racemes, in spring	2 00	15 00
BOLTONIA asteroides. Flowers light salmon colored, star-shaped, disposed in a terminal panicle; blooms in August	1 25	8 00
BUXUS sempervirens. Common Box. A low growing evergreen shrub useful for borders to walks, etc. .	1 50	9 00
CALLIRHOE involucrata. Flowers crimson, nearly two inches across, borne in a loose panicle in summer	1 50	10 00
CALTHA palustris. The well known Marsh Marigold, which bears its bright yellow flowers in early spring. Succeeds best in a damp place	1 00	6 00
CAMPANULA Carpathica. A low growing Campanula; large showy blue flowers borne all summer . .	1 50	10 00
C. Carpathica alba. A very fine white variety	2 00	12 00
C. persicæfolia. A fine border plant, two to three feet high, with large flowers of showy blue. Excellent for cut-flowers	1 50	10 00
C. persicæfolia alba. Similar to the preceding, but with white flowers	1 50	10 00
C. persicæfolia alba plena. Very beautiful variety; double bell-shaped flowers of lasting quality when cut	2 00	12 00
CARDAMINE pratensis plena. A very pretty purple flower, rising to over a foot in height	1 50	9 00
CASSIA Marylandica. A low growing shrub with pinnate leaves and yellow flowers in racemes	1 50	10 00
CLEMATIS. See page 21 of this catalogue.		
COREOPSIS lanceolata. This is, without doubt, one of the finest hardy		

	Per doz.	Per 100
COREOPSIS, continued.		
perennials. The flowers are produced in the greatest profusion from June until frost; the branching wiry stems make it especially suitable for cutting	\$1 25	\$8 00
C. rosea. Flowers with rose red rays and yellow disc	1 00	6 00
DELPHINIUM sinense. A low growing branching species, with fine showy flowers, white, light and dark blue, in close racemes. A plant of very elegant habit, and fine for cutting	1 75	12 00
D. in Varieties. Very useful and handsome border plants. The plants are of stately habit and make excellent centers for beds. The flower spikes hold a long time when cut	1 50	9 00
D., Double Varieties	1 50	10 00
DIANTHUS barbatus. Very effective and showy border plant, and fine for cutting	1 25	8 00
D. deltoides. Flowers solitary, rose colored, borne in summer on stems six to nine inches high	1 25	8 00
D. Hispanicus. Large flowers of bright crimson, borne all the season. Excellent for cutting	1 25	8 00
D. plumarius plenus albus. White, double, the petals with jagged and toothed margins; sweet scented	1 25	8 00
D. plumarius plenus roseus. Similar to the preceding, but the flowers are purple or pink	1 25	8 00
DICENTRA eximia. Drooping flowers of reddish purple borne in compound racemes in late spring and early summer	1 25	8 00
DIGITALIS gloxinoides. A well known ornamental plant; fine for massing or cutting	1 50	9 00
D. gloxinoides alba. A white variety	1 75	10 00
D. purpurea alba. A fine white variety of the common foxglove. Very useful for planting in borders	1 50	9 00
DORONICUM plantagineum excelsum. Very fine for winter forcing; height, three to four feet; flower heads yellow, four to five inches across. In the way of <i>D. Caucasicum</i> , but much finer	2 00	15 00
ECHINACEA purpurea. A very showy plant, the bright rosy purple flowers succeeding each other for over two months. Useful for cutting	1 50	9 00
ERYNGIUM amethystinum. Flowers amethyst purple, in globose heads. Height, one to two feet	1 50	9 00

	Per doz.	Per 100
ELYMUS glaucus. An ornamental grass, forming tall clumps covered with arching glaucous blue leaves . . .	\$2 00	\$15 00
ERIGERON aurantiacus. A fine plant with bright orange colored aster-like flowers two inches across. A good flower for cutting purposes . . .	1 50	8 00
E. glaucus. A fine border plant, growing two feet in height and producing numbers of lilac-rose rayed heads of flowers	2 00	12 00
ERYSIMUM pulchellum. A prostrate plant with numerous pale yellow flowers in early summer	1 75	12 00
EULALIA Japonica variegata. A handsome grass, growing five to eight feet in height, the green leaves marked with white bands	2 00	15 00
EULALIA Japonica zebrina. A very handsome form with yellow bars running transversely across the leaves	2 50	18 00
EUONYMUS radicans. A handsome shrubby foliage plant, well suited for trailing over rocks, stumps, etc. Very free growing and useful	1 50	10 00
E. radicans variegata. A variety of the preceding with fine variegated foliage. When trimmed it makes a good stiff border	1 50	10 00
EUPHORBIA corollata. Flowers white at the end of the branches; plant with a milky juice	1 50	10 00
FUNKIA cordata. Flowers white; leaves broad, pale green	1 25	8 00
F. cordata variegata. A variety with the leaves marked with white	1 50	10 00
F. lanceolata. Flowers white, the leaves longer and narrower than in the preceding variety	1 00	6 00
F. lanceolata variegata. A variety with the leaves marked with white	1 25	8 00
F. undulata variegata. A very fine border plant with crinkly foliage, variegated with creamy white. Useful for edging	1 50	10 00
GLECOMA hederacea variegata. A good plant for hanging baskets. The leaves are prettily variegated; the habit of the plant is trailing	1 00	6 00
GERANIUM platypetalum. A very showy border plant, the deep violet flowers being borne in great profusion. Excellent for cutting in early summer	1 50	9 00
HELIANTHUS Maximilianii. A large growing and very free flowering species remaining in bloom till late autumn; a valuable species for cutting purposes	2 00	12 00

HELIANTHUS, continued.	Per doz.	Per 100
H. multiflorus plenus. An autumn bloomer with large double flowers; a valuable species for cutting . . .	\$1 50	\$8 00
H. multiflorus grandiplenus. An improved variety of the last, with very showy flowers not unlike a yellow chrysanthemum, 4 to 5 in. across . . .	2 00	12 00
H. orgyalis. Flower heads yellow, rather small, but very numerous in a large panicle; one of the best autumn flowering plants	2 50	18 00
HELIOPSIS laevis. A valuable plant, blooming steadily from midsummer to frost; flowers large and borne in in great profusion; invaluable for cutting	1 50	9 00
HELLEBORUS niger. This species is very valuable for forcing in winter; when covered with a frame the beautiful white flowers may be had in bloom at Christmas	1 50	12 00
H. maximus. Larger flowered than the next; a free grower and excellent for cutting	3 00	22 00
HEMEROCALLIS flava. A beautiful plant, admirable for forcing; the sweetscented lemon-yellow flowers succeed each other for some time . . .	1 50	8 00
H. fulva. Flowers a tawny color, borne all summer	1 00	6 00
HEPATICA angulosa. An exceedingly bright colored species, the large deep blue flowers appearing in early spring before the leaves . . .	2 00	12 00
HIBISCUS militaris. A tall growing border plant, with handsome foliage and large pinkish white flowers in early summer	2 00	12 00
HOLLYHOCKS. Of this well known and noble plant we have an immense stock, grown from the finest double strain of seed, which we are pleased to offer, but do not guarantee that each plant will come true to color or double, though at the same time fully 95 per cent. will do this. Assorted colors	2 00	12 00
IRIS cristata. An exceedingly pretty dwarf species, well adapted for edgings; flowers pale blue with white markings	1 00	6 00
I. cuprea. Flowers dull yellow, borne on stems often three feet high in April and May	2 00	15 00
I. flavescens. Flowers lemon-yellow; a fine variety for borders, its flower stalks, two to three feet high, being produced in May	1 50	10 00
I. Germanica, in Varieties. A highly ornamental species; the stately habit, the brilliancy and variety of

PENTSTEMON pubescens. A smaller species, with spikes of lilac flowers	\$1 50	\$8 00
PHALARIS arundinacea variegata. A very ornamental grass with striped leaves. Useful for massing or cutting	1 00	6 00
PHLOX amœna. Unsurpassed for spring bedding, the foliage being entirely hidden under the profusion of bright pink bloom	1 00	6 00
P. Carolina. A beautiful pink-purple flowered species, bearing large clusters of flowers nearly all summer. Valuable for cutting	1 50	8 00
P. paniculata, in varieties. Undoubtedly one of the most showy of hardy perennials. For display of bloom or for cutting, nothing is better than a selection from this handsome section	1 50	8 00
P. paniculata, "The Pearl." A pure white dwarf variety. The flowers do not shatter, and its compact heads are fine for cutting; a grand novelty, and bound to find favor with the florists	1 75	12 00
P. subulata. A prostrate species, making an excellent spring bedder. Flowers a pale pink, from moss-like foliage	1 00	6 00
PHYSOSTEGIA Virginiana. A handsome border plant, with one-sided racemes of purple flowers, produced all summer	1 00	6 00
POLEMONIUM cœruleum. A very useful border plant. Flowers on tall spikes in early spring; in color a good blue, showing the yellow stamens	1 50	10 00
P. reptans. A dwarf species, forming tufts of fine foliage, covered in early spring with showy blue flowers	1 50	8 00
POTENTILLA, double hybrids. Several varieties with red and yellow flowers; fine for borders or rock-work	1 50	8 00
P. fruticosa. A dwarf growing shrub which bears bright yellow flowers in early summer	1 50	10 00
PRIMULA acaulis, in varieties. The flowers, yellow, pink or white, are borne singly in early spring	1 75	12 00
P. elatior, in varieties. Flowers vary from yellow to deep maroon. Very suitable for planting in rock work or borders	1 75	12 00
P. Japonica. Flowers of various colors, pink, white, lilac, dark red, etc. Scapes 1 to 2 feet high	2 50	18 00
P. Sieboldii, in varieties. A grand Japanese hardy primrose varying		

	Per doz.	Per 100
in color from white to deep rose and purple	\$2 50	\$18 00
PYRETHRUM roseum, named varieties. This is an excellent plant for cutting purposes. The shades of color run from white to crimson, and the flowers are both double and single.		
Single varieties	2 00	15 00
Double varieties (to color, including white)	2 50	18 00
P. uliginosum. A grand plant for fall cutting, growing 4 feet high and covered with a profusion of large white flowers	2 00	12 00
RANUNCULUS aconitifolius flore plena. A delightful plant, and excellent for cut-flowers, being pure double white and very prolific. Height, 6 inches to 2 feet. Commonly known as white "Bachelor's Button"	2 00	15 00
RUDBECKIA laciniata. A tall growing species with large, showy flowers. Excellent for tall borders and for cutting	1 50	10 00
R. maxima. A tall growing species, with bright, yellow flowers	2 00	12 00
R. speciosa. A fine plant for cutting or massing. Flowers with orange colored rays and a black disc. Height, 2 to 3 feet	1 50	9 00
R. sub-tomentosa. A tall species, with handsome broad leaves and an abundance of showy yellow flowers all through the summer	2 00	12 00
RUELLIA ciliosa. A pretty prostrate plant, effective in low borders, producing abundant lilac flowers in late summer	1 50	10 00
SALVIA pratensis. Flowers bright blue, about an inch long; borne in spikes in summer	2 00	12 00
SANGUINARIA Canadensis. The pretty white poppy-like flowers appear in earliest spring before the leaves. Useful for borders	1 00	6 00
SCHIZOSTYLIS coccinea. A late fall flowering perennial, with blood-red flowers on an erect spike	25	1 50
SEDUM Fabarium. With the habit of <i>S. spectabile</i> , but with dark colored leaves; a fine plant	2 00	12 00
S. spectabile. A very fine plant for borders and edging; leaves broad and showy. Flowers produced in September in rosy-purple clusters. Very fine for pots	1 50	8 00
S. spectabile album. White variety of the preceding	1 75	10 00

	Per doz.	Per 100		Per doz.	Per 100
SILPHIUM perfoliatum. A large leafed, stout growing composite, with large clear lemon-yellow flowers. The plant is covered with blossoms from the middle of summer through the season.	\$2 00	\$12 00	TRADESCANTIA pilosa. Similar to the next, but with somewhat broader leaves and darker flowers	\$1 25	\$8 00
SOLIDAGO, in several varieties. Very showy for massing or cutting in the fall.	1 50	8 00	T. Virginica. Flowers an inch in diameter; brilliant purple, borne in a terminal and axillary cymes; blooming from March to May . . .	2 00	15 00
SPIRÆA aruncus. Flowers whitish, in many slender spikes, disposed in a compound panicle	2 00	15 00	T. Virginica alba. A fine variety, with pure white flowers.	1 00	10 00
S. filipendula flore pleno. Flowers white or rosy, borne in loose cymes in June and July.	1 50	10 00	TRILLIUM grandiflorum. A very handsome lily-like spring flower, the large, white blossom rising from three dark green leaves. Fine for forcing and cutting . . .	75	6 00
S. Japonica. A well-known and favorite plant for forcing in March. Strong clumps	65	5 50	TUNICA Saxifraga. Flowers pink, appearing in July. Excellent for planting on rock-work	2 00	15 00
S. Japonica aurea variegata. A fine variety, with yellow markings on the leaves; very effective	2 00	12 00	VERONICA rupestris. Fine prostrate species, with blue flowers; unexcelled for edging or covering of rocks	1 50	10 00
S. Japonica grandiflora. An excellent and undoubted improvement on the old form. Very lasting, and of a fleecy whiteness; invaluable for cutting.	1 75	12 00	V. spicata. A showy plant, bearing handsome spikes of blue flowers in summer.	1 00	6 00
S. Japonica purpurea. A variety with purplish leaves; a very striking plant	2 00	12 00	VINCA minor. An excellent trailing plant for rock-work, producing purple-blue flowers in early spring	1 00	6 00
S. palmata. A beautiful species, with sweet-scented crimson flowers. An exceedingly useful plant for cutting	1 50	10 00	V. minor alba. A variety with white flowers.	1 25	8 00
S. ulmaria. Flowers white, in compound cymes in July and August. .	1 50	8 00	V. minor alba plena. With double white flowers	1 25	8 00
STENACTIS speciosa. A very showy plant, producing numerous blue, aster-like flowers in summer. Height, 1½ feet	1 50	10 00	V. minor purpurea plena. With double purple-blue flowers	1 25	8 00
STOKESIA cyanea. A fine late-flowering plant, with large and showy flowers of a beautiful blue color . .	1 75	12 00	V. minor folia variegata. A variety with variegated leaves.	1 25	8 00
			VIOLA cucullata. The variegated form of the common violet; flowers large, white and blue	1 00	6 00
			V. cucullata alba. Pure white variety; fine for edging	1 25	8 00

Clematis.

We have a fine stock of this most beautiful of climbing plants. The many colors which are now produced by the various hybrids, white, blue, purple, scarlet, in many shades, and the large size of the flowers, together with its hardiness, climbing habit and free-blooming, make them universal favorites.

Any of the following varieties, strong plants, our selection, 35 cents each; customer's selection, 40 cents each.

CLEMATIS SPECIES.

Alpina.	Integrifolia. Flowers nodding; petals coriaceous; blue.
Coccinea. Bright scarlet.	Patens.
Cylindrica.	Stans.
Davidiana.	
Florida. Pale white; double.	

CLEMATIS JACKMANNI VARIETIES.

Anderson Henryii.	Lady Londesborough. Silver grey, with lighter stripe down each petal.
Ascoloniensis.	Lawsoniana.
Belle of Woking.	Lord Londesborough. Mauve, marked with dark red; large.
Duchess of Edinburgh. Fine double white; very large.	Lord Neville.
Duke of Edinburgh. Rich purple; very large.	Lucie Lemoine. Double white; the largest and best.
Earl of Beaconsfield. Fine rich purple; a magnificent variety.	Marie LeFebvre.
Fairy Queen. Pale salmon, with a red band in the center of each petal.	Mdme. Grange. Purplish, with red bands.
Gem. Deep lavender; very fine.	Miss Bateman. White, with yellowish bar down each petal.
Gipsy Queen. Dark velvety purple; a free bloomer.	Mrs. Bush.
Gloire de St. Julien.	Purpurea elegans.
Grand Duchess. Blush white; very large.	Robert Hanbury.
Hendersonii.	Rubella.
Henryii. A strong grower, bearing finely formed flowers of creamy white.	Rubro violacea.
Jackmanni. The best known variety, with flowers of a rich purple, with green stamens.	Sir Garnet Wolesley.
Lady Boville. Greyish blue, flushed with mauve; large.	Stella. Light violet, with band of reddish brown; delicately scented.
	Symeiania. Pale mauve; large.
	William Kennet.

Orchids.

These are quite indispensable to all florists keeping up to time and fashion. They are *recherche* flowers for all special occasions, and while we can ship cut flowers to any distance on receipt of a letter or telegram, we would advise florists to keep some plants in stock, which will grow into valuable and attractive specimens. For more extended description and cultural directions write for our Orchid Book.

	Each	Per doz.		Each	Per doz.
CALANTHE vestita. A very useful terrestrial orchid, producing its pure white flowers in December, January and February	\$0 75	\$7 50	CÆLOGYNE cristata. One of the finest winter-flowering orchids. Sprays of five to seven large white flowers are produced from January to March	\$1 00	\$10 00
CATTLEYA gigas. A very fine species flowering in June, July and August. The flowers are large, the sepals and petals pale rose, the lip darker, with two blotches of yellow.	2 50	25 00	Strong plants	2 50	25 00
C. Mendelli. This fine species produces its pale pink flowers from May to July; the lip is of a rich magenta	1 75	17 50	DENDROBIUM chrysotoxum. A grand species, producing spikes of fine yellow flowers during the winter months	1 50	15 00
C. Mossiæ. This grand orchid blooms from May to July. The large flowers vary from blush and lilac to deep rose	1 50	15 00	D. Devonianum. Flowers of creamy white, marked with pink and purple, are produced the entire length of the pseudo-bulb during the winter months	1 25	12 50
C. Trianae. This is the most useful orchid in cultivation, its fine flowers appearing from January to April. The general color is blush, the lip having an orange yellow throat and bright purple front	1 50	15 00	D. formosum giganteum. A fine, large, white, winter-flowering Dendrobium; the blooms are handsome and showy	1 50	15 00
Strong plants	2 50	25 00	D. nobile. One of the first and also one of the best orchids in cultivation. The flowers, which are white, tinged with pink, and with a lip blotched with crimson, are freely produced on straight stems in February and March. This is a standard variety	1 00	10 00
CHYSIS bractescens. The white flowers are borne in a short raceme during the spring months	1 50	15 00			

	Each	Per doz.		Each	Per doz.
DENDROBIUM thyrsiflorum. The white and yellow flowers of this fine species are produced in large, dense clusters in March and April.	\$1 50	\$15 00	ODONTOGLOSSUM crispum. Acknowledged to be one of the finest orchids in cultivation; long arching spikes of white flowers are produced from January to April.	\$1 00	\$10 00
D. Wardianum. The pseudo-bulbs of this species are covered with white flowers, tipped with bright magenta, and with a bright orange throat, during the winter months.	1 50	15 00	Strong plants	2 50	25 00
Strong plants	2 50	25 00	O. grande. Known as the "Baby Orchid." Cinnamon-brown and yellow flowers are produced from September to December	1 00	10 00
LÆLIA albidia. This is a very useful species, producing a long spike, bearing five to twelve white flowers, tinged with pink, from November to January	75	7 50	O. pulchellum. A species of easy culture, producing very sweet-scented white flowers in the spring	75	7 50
L. anceps. This well known species produces three to five large rose-colored flowers on a long stem, from November to January	75	7 50	O. Rossi majus. A very useful species, flowering during January, February and March	75	7 50
Strong plants	1 50	15 00	Strong plants	1 50	15 00
L. Arnoldiana. A very useful orchid of recent introduction; the flowers, which are produced during October, November and December, are of deep rose, five to fifteen being borne on a spike	2 00	15 00	ONCIDIUM incurvum. Produces a large spike of pure white, marked with lilac and brown; flowers from May to July	1 50	15 00
L. purpurata. A grand species producing from four to six large white flowers with purple lip, from May to July	2 00	20 00	O. papilio. Known as the "Butterfly Orchid." The plant blooms nearly all the year round	1 75	17 50
LYCASTE aromatica. As many as eighteen yellow flowers are produced from one bulb during late winter and early spring	75	7 50	O. ornithorynchum. A free-flowering species, producing its rose-purple flowers, with a perfume like the heliotrope, during the spring months	1 75	17 50
L. Skinneri. One of the most profuse flowering orchids in cultivation; as many as twelve large flowers sometimes being produced by one bulb; the flowers vary in shade from white to rose color, with lip blotched with rose or crimson; blooms same time as <i>L. aromatica</i>	1 00	10 00	O. tigrinum. A very showy sweet-scented species, producing spikes of yellow and brown flowers in the autumn	1 50	15 00
Strong plants	2 50	25 00	O. unguiculatum. An easy growing species, producing large spikes of yellow and brown flowers in fall	1 00	10 00
ODONTOGLOSSUM citrosimum. This species sends out a long, drooping spike of beautiful white or rose colored, lemon-scented flowers in April and May	1 00	10 00	PHALÆNOPSIS amabilis. One of the best orchids known for cut flowers. The large spikes of white are produced during the winter months	2 75	27 50
			P. Schilleriana. The flowers, of a fine rosy color, are produced at the same time as <i>P. amabilis</i>	4 00	40 00
			TRICOPILIA suavis. A very fine species, producing large white flowers, spotted with crimson, in the spring months	1 50	15 00

Cypripediums.

It is a well known fact that the Cypripediums are the most easily grown orchids, and that their flower lasts in perfection longer than any other flower known. This latter is a great recommendation as a cut-flower, and should lead to their cultivation, in at least a small selection, by every florist. The colors are rich and pleasing, and they combine well with roses and fine ferns, or in fact with anything they are used with; while if a basket is filled with Cypripediums alone, a unique effect is produced.

For culture see our little book, "Orchids for Beginners," which is sent free on application.

	Each	Per doz.		Each	Per doz.
CYPRIPEDIUM Ashburtoniæ. A very free-growing hybrid, generally flowering twice a year	\$1 75	\$17 50	C. barbatum superbum. This popular species produces its flowers freely from April to July	\$1 50	\$15 00

	Each	Per doz.
CYPRIPEDIUM Boxallii. This very fine variety produces its flowers, which have a shiny appearance, as if varnished, from December to February	\$1 50	\$15 00
C. Danthieri. This is another free-growing and free-flowering hybrid; blooms in the autumn	2 50	25 00
C. Dominicanum. This fine hybrid produces three to five flowers on a long stem in the autumn; the flowers are very useful for filling vases	1 75	17 50
C. Harrisianum. A grand hybrid, producing flowers twice, or even three times, a year	1 50	15 00
C. hirsutissimum. A very fine species, flowering during the spring months	1 75	17 50
C. insigne. The best known of all orchids; flowers are produced from November to March, and last over twelve weeks on the plant, or three to four weeks when cut	50	5 00
C. insigne album marginatum. A very fine variety of the common <i>insigne</i> , and flowering at the same time	1 75	17 50

	Each	Per doz.
C. insigne maculatum. Stronger in growth, and with better flowers than the type	\$1 50	\$15 00
C. Lawrenceanum. A grand species with beautiful variegated foliage; the flowers, which are on long stems, are generally produced twice a year	75	7 50
C. longifolium. A free-growing species, which produces flowers on long stems, succeeding each other from May to July	1 75	17 50
C. Roezii. The habit and growth same as <i>C. longifolium</i> ; varies only in the color of the flower	1 75	17 50
C. Sedeni. A fine hybrid, producing a long stem, on which large, pink flowers succeed each other from October to May	1 50	15 00
C. venustum. A fine species, with beautiful variegated leaves; the flowers appear during the winter months	75	7 50
C. villosum. Another fine species with shiny flowers, which are produced from January to April	1 50	15 00

Palms.

Of Palms we have a grand stock, clean and well grown. Our plants, having been grown cool, are far better adapted for decorative purposes than those grown in strong heat. The kinds enumerated below are the best varieties in cultivation.

 Twelve plants may be had for the price of 10.

ARECA. A genus of palms with pinnately divided leaves, semi-erect in habit of growth and including several of the best decorative sorts in cultivation. *A. Baueri* and *A. lutescens* are two of the best decorative plants known.

	Each.
A. Baueri. Good plants, three to four leaves. \$0 75	
Strong plants, four to five leaves, one and one-half to two feet high.	1 00
Very strong plants, two feet high.	1 50
Extra strong plants, two and one-half feet	2 00
Extra fine and strong plants	\$3 to 5 00
A. lutescens. Nice plants, one foot high	25
Good plants, one to one and one-half feet high	35
Fine plants, four feet high	\$3 to 5 00
Nice plants, five to six feet high	\$7 to 18 00
A. sapida. Good plants, four to five leaves, two and one-half feet high	2 50
Extra fine and strong plants.	3 50
CHAMAEROPS elegans. Fine specimens, twelve to fifteen leaves, four to five feet high	\$5 to 6 00
Extra fine and large specimens, six to seven feet high	\$7 to 10 00

COCOS Weddelliana. A very useful decorative palm, and the finest of the genus *Cocos*, which includes the Coconut palms.

	Each.
Fine plants from three-inch pots.	\$0 35
Fine plants, five leaves, one foot high	50
Strong plants, six leaves, fifteen in. high.	75
Extra fine and strong plants, seven to eight leaves, one and one-half to two feet high	\$1 50 to 2 00

KENTIA. A genus of palms with gracefully recurved fan-shaped leaves, including several very useful for decorative purposes. The *Kentias* will withstand considerable rough usage.

	Each.
K. Belmoreana. Extra fine stock for growing on, five to six leaves, eight to twelve inches high.	75
Fine plants, six leaves, fifteen inches high	1 00
Strong plants, six leaves, eighteen to twenty inches high	1 50
Fine strong plants, two feet high	2 00
Fine strong plants, two and one-half feet high	2 50

	Each.		Each.
K. Belmoreana , continued.		L. Borbonica , continued.	
Fine and large plants, six leaves, three feet high	\$4 00	Strong decorative plants, nine to eleven leaves, three to three and one-half feet high	\$4 to \$5 00
Half specimens, six leaves, three and one-half to four feet high	8 00	Specimens, four to five feet high	10 00
Specimens, six leaves, four and one half to five feet high	\$10 to 15 00	Extra fine and large specimens, five to six feet high	\$12 to 15 00
Grand specimens, six to seven leaves, six feet high	\$18 to 25 00	PHENIX . The Date Palms when young are very useful decorative plants. The best species are offered below.	
K. Canterburyana . Fine plants	1 50	P. Canariensis . Fine plants, eight to ten leaves, two and one-half to three feet high \$3 to 4 00	
Strong plants	\$2 50 to 3 00	P. reclinata . Fine specimens, five to seven leaves, three to three and one-half feet high	\$4 to 5 00
Extra strong and fine plants, five to six leaves	\$4 to 6 00	P. rupicola . One of the most graceful of the genus.	
Specimens, five to six leaves, five feet high	\$20 to 25 00	Plants to grow on	85
K. Forsteriana . Fine plant to grow on, fifteen inches high	75	Fine plants, five to nine leaves, fifteen to eighteen inches high	\$2 to 3 00
Fine plants, four to five leaves, eighteen inches high	1 00	Half specimens, six to ten leaves, two and one-half to three feet high	\$5 to 8 00
Fine strong plants, two and one-half feet high	2 00	P. Senegalensis . New glaucous species.	
Extra fine and strong plants, five leaves, two and one-half to three feet high \$3 to 4 00		Fine specimens, three to three and one-half feet high, five to six leaves . . \$4 to 5 00	
Half specimens, three and one-half to four feet high	6 00	PTYCHOSPERMA Alexandræ . Fine plants, two and one-half feet high	1 00
Extra fine specimens, five to six feet high	\$8 to 15 00	Strong plants, three feet high	1 50
K. MacArthurii . Fine plants, six to seven leaves, two feet high	1 50	RHAPIS . A genus of Chinese and Japanese palms of upright habit, with reed-like stems and divided leaves; very hardy.	
LATANIA Borbonica . A very useful semi-hardy palm with fan-shaped spreading leaves with the segments very much reflexed.		R. flabelliformis . Nice plants, two to two and a-half feet high	2 00
Good plants to grow on, four to five leaves, one foot high	25	Good plants, three shoots	3 00
Good plants, four to five leaves, one and one-half feet high	50	Fine plants, four to five shoots, three and one-half feet high	5 00
Fine plants, five to six leaves . . \$0 75 to 1 00		Extra large specimens	\$6 to 8 00
Extra fine plants, seven to eight leaves	\$2 to 3 00	SEAFORTHIA elegans . Three to four leaves, two feet high	50

Foliage Plants.

These are as useful as palms for decorations, filling of vases, and other purposes. Our stock contains large assortments of all that have proven most useful and valuable.

	Each.		Each.
ACALYPHA macrocarpa . Good plants . . . \$0 25		ASPIDISTRA lurida . Good plants . . \$0 50 to \$0 75	
ALOCASIA metallica . Very striking plant.	\$0 50 to 2 00	Strong plants	2 50
ARALIA Sieboldii . Fine plants	50	Large specimens	\$5 to 8 00
A. Sieboldii variegata . Fine plants for decorations	1 00	A. lurida variegata . Fine plants	1 00
A. filicifolia . Fine plants	\$0 35 to 50	Strong plants	2 50
ASPIDISTRA . A genus of half hardy foliage plants, bearing evergreen leaves, sometimes banded white, on long petioles. Very useful for decorative purposes.		Large specimens	\$5 to 8 00
		ARAUCARIA . An exceedingly valuable genus for decorative purposes. The plants are coniferous and of a very symmetrical growth, especially when young.	
		A. Cookii . Fine plants to grow on . . \$0 50 to 1 00	

	Each		Each
ARAUCARIA glauca. Fine plants in five-inch pots, 15 to 18 inches high	\$3 to \$4 00	D. amabilis. Fine plants	\$1 50
Grand specimens	6 to 10 00	D. Cantrellii. Fine plants	1 00
A. excelsa. Fine stocky plants in five-inch pots	\$2 50 to 3 00	D. Lindenii. A fine decorative plant; very useful. Fine plants, 12 inches high	1 75
Fine decorative plants	4 00	Strong plants, 15 inches high	2 50
Grand specimens	\$6 to 8 00	Extra strong plants	3 00
BEGONIAS. Best Rex varieties	25	Specimens	5 00
Louis Closson	35	D. Neo-Caledonica (new). Good plants to grow on	1 00
Lucie Closson	35	Extra fine and strong plants	\$3 to 6 00
Arthur Malet	35	D. terminalis. Good plants	50
CALADIUM argyrites. Good bulbs	50	D. Youngii. Fine plants	50 to 75
CALADIUMS. named varieties	35 to 75	FICUS elastica. Fine plants	60
CROTONS, in varieties. Good plants	35	Extra strong plants	75
Strong plants	50	HIBISCUS Cooperii. Very showy variegated foliage. Fine plants	25
CRYPTOMERIA elegans. A fine evergreen conifer. Fine plants, 10 to 12 inches high.	75	ISOLEPIS gracilis. Useful for edging. Fine plants	10
CYCAS revoluta. One of the most useful, if not the most useful of decorative plants. Fine plants, several sizes	\$2 to 6 00	PANDANUS utilis. Good plants from four-inch pots	15
Extra large specimen plants, prices on application.		P. Veitchii. Fine plants for table decoration. Good strong plants, 18 inches to 2 feet high	\$2 50 to 3 00
CYPERUS alternifolius. Fine plants	20	Specimens, well furnished, 2½ to 3 feet high	\$5 to 6 00
C. alternifolius variegata. Fine plants	1 00	PANAX Victoriae. Good plants	35 to 50
DRACENA. This genus includes many grand plants for decoration. Their broad leaves, often margined or variegated with shades of red or white, make them useful and attractive; best varieties are given below.		PHRYNGIUM variegatum. Good plants	50 to 75
D. Anerleyense. Fine plants	1 00	ZAMIA integrifolia. A fine plant for decorative purposes, similar to <i>Cycas revoluta</i> . Good strong plants	75 to 3 00

Miscellaneous Plants.

Any plants worth growing will be found in our establishment, such as Clematis, Ericas. Tuberous gooted Begonias, Rex Begonias, flowering plants of all kinds, and all the best novelties of each season. Write for our catalogues, which are sent free for the asking.

	Each		Each
ANTHURIUM Andreanum. A grand and useful plant, its bright spathes lasting long in perfection. Good plants	\$1 00	To color. \$6 per dozen	\$0 60
Strong plants	2 50	ERICA hyemalis. Fine plants	60
A. Scherzerianum. Fine plants, well furnished	1 00	E. gracilis. Fine plants	60
BROMELIADS. Of these interesting plants we have a good selection. According to variety	75 to 3 00	E. Wilmoreana. Fine plants	60
CYCLAMEN Persicum giganteum. Finest varieties only. Assorted colors, good flowering bulbs. \$4 per dozen, \$35 per hundred	40	EUCHARIS Amazonica. Fine bulbs of this splendid winter bloomer	\$2.50 doz. .
		IMANTOPHYLLUM miniatum (<i>Clivia nobilis</i>). A fine flowering plant, producing orange red flowers freely throughout the winter season. Fine plants	1 00
		Strong plants	1 50
		SARRACENIA flava. Fine plants	50 to 1 00
		S. Drummondii. Fine plants	\$1 to 3 00

Ferns and Selaginellas.

This class of plants is extensively used for ornamenting dinner tables as well as for other decorative purposes. We have thousands of all the leading sorts at low prices, while our collection comprises all the best and valuable varieties.

	Per doz.	Per 100		Per doz.	Per 100
ADIANTUM cuneatum. The popular sort for cutting; very largely grown			SELAGINELLA, in varieties. Fine plants for decoration; used as ferns.

Fine strong plants	1 50	10 00	Strong plants	1 75	10 00
SCOLOPENDRIUM vulgare. A fine hardy fern for decorations; handsome and quite distinct from other ferns. Good plants.	1 25	6 00	PTERIS Argyrea. Large plants. 35 to 50 cents each.		
Extra strong plants	1 50	10 00	ASSORTED Ferns for decorative purposes. Fine plants	75	5 00
			Extra strong plants	1 25	8 00

TO FLORISTS.

Our extensive stock includes all the rarer and less known desirable plants in all classes, as well as the commoner sorts which are known to every florist. We will take pleasure in giving estimates for filling greenhouses or will send descriptions of special plants of Palms, Tree Ferns, Cycads, Orchids, etc., which may be wanted.

We are also prepared to make selections of hardy herbaceous plants and bulbs for planting out around suburban residences, in beds and borders, or public parks and gardens, however large. Correspondence in regard to matters of this kind is invited.

CUT FLOWERS.

We are at all times prepared to send boxes of cut Orchid flowers, etc., on receipt of a letter or telegram. Some species or other are in blossom at any season of the year, and for special occasions the stock of the local florist is either inadequate or unsuitable. In the autumn and winter when our large collections of Chrysanthemums and Genistas are in blossom, we can supply cut flowers or specimen plants in flower, of almost any description and in almost any quantity. We are glad to give information regarding what plants are in flower at any time.

Choice Flower Seeds for Florists' Use and Autumn Planting.

Trade packets will be found to contain a liberal supply, at least three times the quantity usually put up in retail packets. Quarter ounce furnished at ounce rate, quarter pound at pound rate.

General List of Vegetable Seeds.

We wish to call the attention, especially of market gardeners and florists, to our seeds. From personal experience we know the vital importance of purity of stock and high germination. In this department purchasers may have every confidence in the goods we offer, as every article we send out will be tested both for germination and purity. We have spared ourselves no expense in the preparation of seed testing houses and trial and experimental grounds, and have secured only skilled help, many of whom have spent a lifetime in this business.

In most cases the seeds we offer will represent the new crop of 1891, grown by reliable men under our personal supervision; but owing to the southern planters requiring seeds before the new crop is ready we give as nearly as possible a complete list of vegetable seeds, and in flower seeds a condensed list of florists' flowers.

Quarter pound furnished at pound rate, ten pounds at hundred pound rate, and peck or quarter bushel at bushel rate.

When seeds are to be sent by mail, eight cents per pound for seeds sold by the pound, and fifteen cents per quart for peas and beans, must be included for postage.

Long Green	05	10	50

ONIONS—Italian Varieties. These varieties can all be planted in the fall, but need slight protection during the winter when sown north of Maryland. They are specially adaptable for growing in the Southern States for market purposes, but as they are poor keepers, they are usually sold in the green condition, bunched.

	Pkt.	oz.	lb.
New Mammoth Pompeii	\$0 05	\$0 20	\$1 75

Books.

A list of Horticultural and Gardening books, a selection of which should be in the library of every florist, gardener, or amateur grower and lover of plants and flowers.

- The Illustrated Dictionary of Gardening.** A practical Encyclopedia of horticulture for Gardeners and Botanists. By G. Nicholson, and others. *Illustrated with numerous full-page plates printed in colors, and over 2,000 accurately executed wood cuts in the text.* The most complete work of the kind ever published, giving full particulars regarding all kinds of exotic and hardy plants and vegetables in cultivation. 4 vols., imp. 8vo, including the supplement of new species and varieties, cloth, gilt edges, \$20.
- Henderson's New Hand-book of Plants and General Horticulture.** A dictionary of the principal cultivated plants, with short descriptions and an extensive Glossary of Botanical and Horticultural terms. 1 vol., imp. 8vo, cloth, \$4.
- The Orchid Grower's Manual.** By Benjamin Samuel Williams. New edition, enlarged and revised, containing descriptions of upwards of 1,470 species and varieties. *Illustrated with a large number of full page and double page engravings, and some small engravings in the text.* 8vo, cloth, \$7.
- Choice Stove and Greenhouse Flowering and Ornamental-Leaved Plants.** By B. S. Williams. With descriptions of upwards of 1,100 species and varieties with instructions for their culture. *With colored frontispiece and many engravings on wood.* 2 vols., 12mo, cloth, \$5.
- Parsons on the Rose.** A treatise on the Propagation, Culture and History of the Rose by Samuel B. Parsons. New and revised edition, *with numerous illustrations.* 12mo, cloth, \$1.
- Practical Floriculture,** a Guide to the Successful Propagation and Cultivation of Florists' Plants. By Peter Henderson. New and enlarged edition. *With numerous illustrations.* 12mo, cloth, \$1.50.
- The Rose.** By B. Ellwanger. A Treatise on the History, etc., of the Rose, with directions for its Cultivation, including a descriptive alphabetical list of 956 varieties. 12mo, cloth, \$1.25.
- Bulbs.** By Edward Sprague Rand. A Treatise on Hardy and Tender Bulbs and Tubers. The best book on the subject for Americans, being written especially for the conditions, climate, etc., of this country. 12mo, cloth, \$2.50.
- The Silva of North America.** A description of the trees which grow naturally in North America, exclusive of Mexico. By Charles Sprague Sargeant. *Illustrated with figures drawn from nature by Charles Edward Faxon.* To be complete in 12 volumes, 4to, each volume containing 50 plates; cloth, \$25 per volume. Vols. I and II now ready.
- The Native Flowers and Ferns of the United States,** in their Botanical, Horticultural and Popular Aspects. By Thomas Meehan. *Illustrated with very many chromo-lithographs.* Two series, together 4 vols., 8vo, cloth, \$28.
- Practical Camellia Culture.** A Treatise on the culture and Propagation of *Camellia Japonica*. By Robert J. Halliday. *Illustrated with five colored plates and fifty wood engravings.* 12mo, cloth, \$2.
- Practical Azalea Culture.** A treatise on the Propagation and Cultivation of *Azalea Indica*. By Robert J. Halliday. *With illustrations.* 12mo, cloth, \$2.
- The Tuberous Begonia,** Its History and Cultivation. With a select list of varieties. 12mo, paper, 50 cents.
- Chrysanthemum Culture for America.** By Jas. Morton. Full instructions for growing flowers for exhibition purposes, etc. 12mo, cloth, \$1.
- Gardening for Pleasure.** A Guide to the Amateur in the Fruit, Vegetable and Flower Garden, with full Directions for the Greenhouse and Window Garden. By Peter Henderson. *With illustrations.* 12mo, cloth, \$2.
- Gardening for Profit.** A Guide to the Successful Culture of the Market and Family Garden. *With numerous illustrations.* By Peter Henderson. New edition, entirely rewritten and greatly enlarged. 12mo, cloth, \$2.
- How the Farm Pays.** By William Crozier and Peter Henderson. Full information in a popular, not scientific, style. *Profusely illustrated.* 3vo, cloth, \$2.50.
- New American Farm Book.** By R. L. Allen, and revised and enlarged by Lewis F. Allen. Treating on all the various branches of industry connected with the farm. 12mo, cloth, \$2.50.
- Grasses of North America,** for Farmers and Students. By Prof. W. J. Beal. The most recent and complete work on American Grasses; written in a popular style which can be comprehended by those who have not studied botany. *With many illustrations.* 8vo, cloth, \$2.50.
- Grasses and Forage Plants.** A Practical Treatise on the Fodder Plants of the United States and the British Provinces. By Charles L. Flint. New revised edition. *With numerous illustrations.* 12 mo, cloth, \$2.
- Success with Small Fruits.** By E. P. Roe 12 mo, cloth, *with numerous illustrations*, \$1.50.
- Play and Profit in My Garden.** By E. P. Roe. 12mo, cloth, \$1.50.

The Home Acre. By E. P. Roe. A popular and instructive book written in an entertaining style, by the well-known and popular novelist, whose country seat at Cornwall-on-the-Hudson was one of the most beautifully laid out places in the country at the time of the author's death. 12mo, cloth, \$1.50.

How Crops Grow. A Treatise on the Chemical Composition, Structure and Life of the Plant. By Prof. Samuel W. Johnson, of Yale College. New edition, entirely rewritten and greatly enlarged. *With numerous illustrations.* 12 mo, cloth, \$2.

How Crops Feed. By Prof. Samuel W. Johnson. A Treatise on the Atmosphere and the Soil as relating to the Nutrition of Agricultural Plants. *With illustrations.* 12 mo, cloth, \$2.

Elements of Agriculture. A Book for Young Farmers. By George E. Waring, Jr. New edition, carefully revised. 12mo, cloth, \$1.

The Propagation of Plants. Describing the processes of Hybridizing and Crossing Species and Varieties, and also of many different modes by which the cultivated plants may be multiplied. By Andrew S. Fuller. *With illustrations.* 12 mo, cloth, \$1.50.

Practical Forestry. A Treatise on the Propagation, Planting and Cultivation, with descriptions, of the Indigenous Trees of the United States, with notes on a large number of valuable exotic species. By Andrew S. Fuller. *Illustrated.* 12mo, cloth, \$1.50.

The Nursery Book. A Complete Hand-book of Propagation and Pollination. By Prof. L. H. Bailey, of the Cornell Experiment Station. The book tells plainly and briefly what every one who sows a seed, makes a cutting or sets a graft wants to know. *With about 100 illustrations.* 12mo, cloth, \$1.

The Horticulturist's Rule Book. By L. H. Bailey. Contains a great number of rules and receipts used by florists, gardeners, farmers, etc., etc. Revised edition. 12mo, cloth, \$1.

Ornamental Gardening for Americans. A Treatise for beautifying Homes, Rural Districts and Cemeteries. By Elias A. Long. *With numerous illustrations.* 12mo, cloth, \$2.

Truck Farming at the South. A Guide for the Raising of Vegetables for Northern Markets. By Dr. A. Oemler. Gives full cultural directions; also methods for packing. *With illustrations.* 12mo, cloth, \$1.50.

Any of the above books will be sent by mail or express prepaid on receipt of the stated price. Any other Horticultural or Farm books can be supplied, and at the publisher's price; and subscription for any Horticultural paper or magazine will be received at regular rates.

PATENT PROTECTING CLOTH.

PLANT BED CLOTH

As a Substitute for Glass Sash on Hot Beds and Cold Frames.

ONE-TENTH THE COST OF GLASS AND EQUAL THERETO,

Don't shrink in exposed service, or decay rapidly. Protects plants in Spring or Fall from frosts, etc. Promotes early, hardy and vigorous growth, allows healthy ventilation and produces best plants.

ABOVE CLOTH IS ALL 36 INCHES WIDE.

LIGHT GRADE	MEDIUM GRADE	HEAVY GRADE
Pieces run 68 to 110 Yards.	Pieces run 40 to 50 Yards.	Pieces run about 40 Yards
HEAVY WATERPROOF SHEETING, 36 inches wide. Pieces run 40 Yards.		
WATERPROOF BURLAP, for Winter Protection on Frames, etc.		

This Plant Bed Cloth Covering for hot beds and cold frames has been used by leading florists and growers all over the United States, and is very strongly endorsed by them. Its cost is so moderate and its use is so effectual that hot beds and cold frames can be constructed very simply and cheaply and prime early flowers and vegetables be obtained by all.
